

The drawing shows a mechanical part with a curved profile. It features two vertical support lines on the left and right. A dimension line on the left indicates a total height of 141 units, marked with double asterisks (**). A second dimension line, positioned to the right of the first, indicates a height of 80 units, marked with a single asterisk (*). The part has a curved top surface and a flat bottom surface. To the right of the main drawing is a detail view of a circular feature, which appears to be a gear or a similar circular component with a central hole and radial lines.
